

Tourist mine and museum offers different kinds of mine tours:

1. Mine tour by bicycle:

Mountain bikes were made for exploring the mountains, but here you can ride your bike through the mountain. A path through the abandoned and mysterious mining tunnels was discovered under the Peca mountain. Led by a guide and equipped with helmets and flashlights you can safely ride from one valley to another on a more than 5-kilometer- long underground path. Prepare to experience an unforgettable adventure.

2. Mine tour by train:

A genuine mining train will take you deep under the surface into the heart of the lead and zinc mine. Following the museum trail you'll learn more about the history of mining and the lives of our miners in different periods of time. Experience first-hand what it was like to be a miner.

3. Mine tour by kayak:

Exploring the underground labyrinth and paddling in the underground lake is a unique experience that will leave your breathless. You will be fascinated by the silent world of stone monuments that were carved throughout the centuries by our miners. Crystal clear water, magical underground caves and a peaceful silence promise an unforgettable experience.

Short description

The event will be held in the Mežica mine museum. The mine is one of the oldest mines in Europe. It was first mentioned in 1665. It was filled with lead and zinc and was closed in 1993. After that it was transformed into the museum. Apart from mine tours, there are concerts and other interesting events held inside.

CYCLING GEEKS

Mine tour
